AUTOMATIC LABELLER FOR ROUNDS
Pk-80
DESCRIPTION

may not integrate a camera system. Pk-80 provides that the product falls after labelling (of one or two labels) into an underlying container, placed on the lower surface of the frame, allowing labelling of products with dimensions from 10 to 35mm in diameter and up to 100mm in height. The labels can be 20 to 100mm wide.

Pk-80 can be connected to the most popular industrial thermal printers also with save-ribbon or to the HP technology inkjet marker for variable data printing. It can also be connected to the most popular in-line colour printers for printing and direct application on products in a single work cycle.

TECHNICAL CHARACTERISTICS

PRODUCT DIMENSION MAX	40 mm
PRODUCT DIMENSION MIN	10 mm
PRODUCT MAX HEIGTH	150 mm
LABEL HEIGTH	140 mm
PRODUCTIVITY	2000 pc/hour. Depending of label dimensions
FRONT/REAR LABEL	Si
LABEL FEEDIING	Patented automatic feeding
INKJET COLOR PRINTER CONNECTION	Yes, optional
THERMAL PRINER CONEENCTION	Yes, optional
INKJET CODER	Yes, optional
TRANSPARENT LABELS	Yes, optional
SPECIAL RUBBER ROLLER	Yes, optional
POWER	220/110 Volt Ac 300 W
COMPRESSED AIR	yes
WEIGTH	80 Kg
DIMENSION	1500x500x120 H. cm.
